A View From The Footplate

Since Don B., regular author of the View from the Footplate, apologizes for not having the time to pen his regular observations but all the moving activities have kept him rather busy and so his regular View is not available this month. Instead of a view *from* the footplate, enjoy this view *of* the footplate!

Module Rework Project

Our team leaders, Grant and Robin, have asked that we add Saturdays to the module rework schedule. The sessions are here in Naperville at my house Wednesday evenings from 6:30 on and Saturday afternoons from 1:00 onwards. Hope to see you here. We can use whatever help you can give us.

For John Walsh: We need to know if you are going to let us have the corner module or not. We cannot rewire all the modules and then test them together unless we have all four corners. If you are not going make it

available we will have to build a replacement corner in a hurry. The show is next month. Please do us the courtesy of letting us know something.

For those of you who are also in the ETE: Do any of you know if John Walsh has a new phone number or new e-mail address? As you can tell by the above paragraph I have been trying to get in touch with him but with no success.

This Saturday the 14th will be a combined Monthly BTS meeting and Work Session here.

Regards,

Harry
